RStudio

## **WHY?**

To visualize the impact of climate change and other shocks to Boston's food system, understand the risks, and tell more compelling stories.

## **HOW?**

Participants will explore data – from economic to environmental science to urban planning – and use an array of visualization tools and storytelling techniques.

## **WHO IS INVITED?**

The Northeastern community and beyond. No coding skills necessary!

## **WHO WILL BE THERE?**

Brian Romer, Data Visualization lead, Thomson Reuters Labs  
Tim Reardon, Director of Data Services, MAPC

Northeastern University  
College of Arts, Media and Design

**JOURNALISM**

**ART + DESIGN**
